

Uploading your website to GPH server

1. What you need?

- A computer.
- Your credential to access GPH server (if you forget the password, email me).
- A creative mind.

2. Preparing your HTML file(s)

2.1 **index.html (or index.php)** can be prepared on your personal computer using plain text editor: notepad or notepad++ (<https://notepad-plus-plus.org>).

2.2 Use sFTP (FileZilla) to upload your files inside the folder named as **www**

2.3 You can then view your website at **<http://gph.sc.mahidol.ac.th/scpy204/~u5805xxx>**
