Computer Programming for Physicists

```
# Hello, World!  
print "I am your lecturer for SCPY204 (first half)"  
  
# Puwis Amatyakul  
  
IF "contact needed" THEN  
    print "email: puwis.ama@mahidol.ac.th"  
    print "office: P621"  
  
END
```

Happy New Year
2019

What we are going to do...

Lecture

- Getting to know each others.
- Sure! First lecture: “**Computer and programming basics**”.

Lab

- Setup programming environment.
- Write your (first) program (in Matlab, Python and C).

**Can you write
a computer program?**

“The goal of the course”

You are able to program.

“The goal of the course”

Creator,

User → Developer

“Everybody in this country should learn to program a computer, because it teaches you how to think”

— *Steve Jobs*

“Learning to write programs stretches your mind, and helps you think better, creates a way of thinking about things that I think is helpful in all domains”

— **Bill Gates**

“All of my friends who have younger siblings who are going to college or high school - my number one piece of advice is:
You should learn how to program”

— *Mark Zuckerberg*

“As a physicist, being able to program
expands your fruitful possibilities”

Trust me! I am a (computational) physicist.

— *Your Lecturer*

Computer

A **computer** is a device that can be instructed to carry out an arbitrary set of arithmetic or logical operations automatically.

The ability of computers to follow a sequence of operations, called a **program**, make computers very flexible and useful.

Introduction to

Programming

What is Programming?

“A computer program is a set of instructions.”

Every computer program is a series of instructions. A sequence of separate small commands, one after the other. This is to serve a purpose.

What is Programming?

**An idea or
a project**

Individual steps

Programming language

Can you program your friend to come here from Victory monument?

ถามเล่น ๆ

> อ.ภู อยากจะทราบเหลือเกินว่า ถ้า อ. นำเงิน 100,000.00 บาท ไปลงทุนในกองทุนรวมที่มีดอกเบี้ยทบต้นปีละ 3% เมื่อ อ. ภูอายุ 60 ปี เงินก้อนนี้จะมีมูลค่าเป็นเท่าไร

> แล้วถ้ากองทุนสัญญาว่าบริหารให้ดอกเบี้ยจะเพิ่มขึ้น 1% ในทุก ๆ 5 ปี เมื่อ อ. ภูอายุ 60 ปี เงินก้อนนี้จะมีมูลค่าเป็นเท่าไร

Programming language

Statement - sentence

Syntax- grammar/format

C

```
// My first C program#include
<stdio.h>int main()
{
    printf("Hello, World!\n");
    // displays Hello, World! on the screen
    return 0;
}
```

Python

```
print("Hello, World!")
```

Setting up
programming
environment

See: www.programiz.com

What do you need for your first program

- A computer (with an OS)
- A preferred programming language
- Text (code) editor
- A compiler or an interpreter
- Lines of code
- A debugger
- A display
